

环境可控  
高效丰产

以色列

无土栽培

新技术

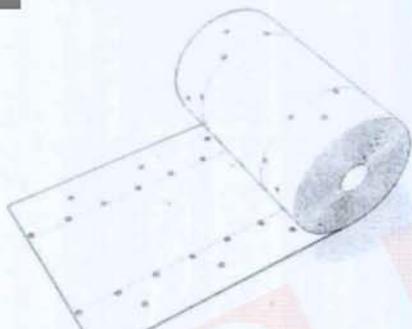

适合于蔬菜，玫瑰，切花，香草，草莓，以及种植袋种植系统的无土栽培

一 Troughing System - Instructions for Use 种植槽系统-使用说明

将PP卷打开并按所需长度进行裁剪

1

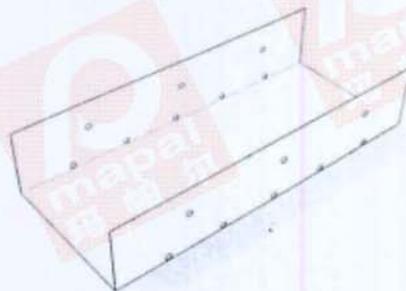

Spread the polypropylene roll in place and cut to required length

沿折印将种植槽折起来

2

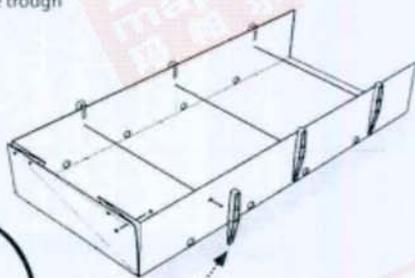

Fold the trough along the creases

将塑料绳穿过槽边孔及固定梢,并在底部固定

3

Attach the hole in the trough and the peg and lock into the bottom position. Attach the "pen clip" of the peg onto the upper lip of the trough

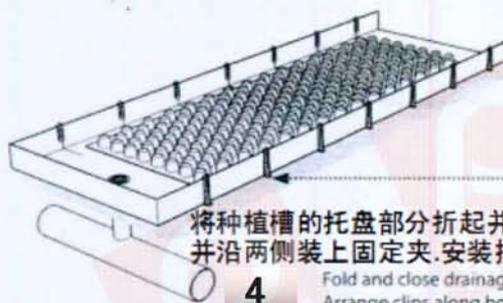

种植槽固定梢

将种植槽的托盘部分折起并封口,并沿两侧装上固定夹.安装排水格(可选).

4

Fold and close drainage envelope. Arrange clips along both sides of envelope. Place drainage spacer on top of envelope-(optional)

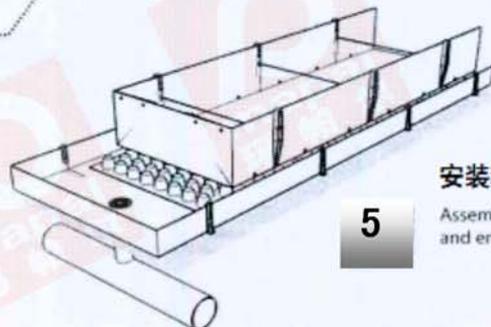

Trough Clips

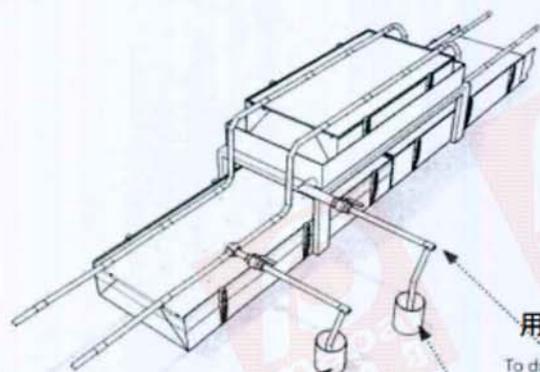

安装种植槽与托盘

5

Assembled trough and envelope

二 Lysimeter

用于收集与监测滴灌水

Container for collecting, testing and measuring drip irrigation water

用于排水

To drainage

用于收集和监测排水水

Container for collecting, testing and measuring drainage water

### 三 Hanging Gutter System for Strawberries 草莓的悬吊水槽系统

### 四 Assembly of Hanging Gutter System 悬吊水槽系统的组装

1. Spread the polypropylene container on a flat surface and fold along the crease marks in order to facilitate construction.

2. Fold the polypropylene container, making sure the top straps and end flaps are properly attached.

3. Insert the polypropylene container into the PVC drain collection gutter.

4. ASSEMBLY OF THE DRAIN END SECTION  
排水槽端头的安装  
Insert the 1.25" drain unit into the hole in the PP end section.

PP 塑料种植槽

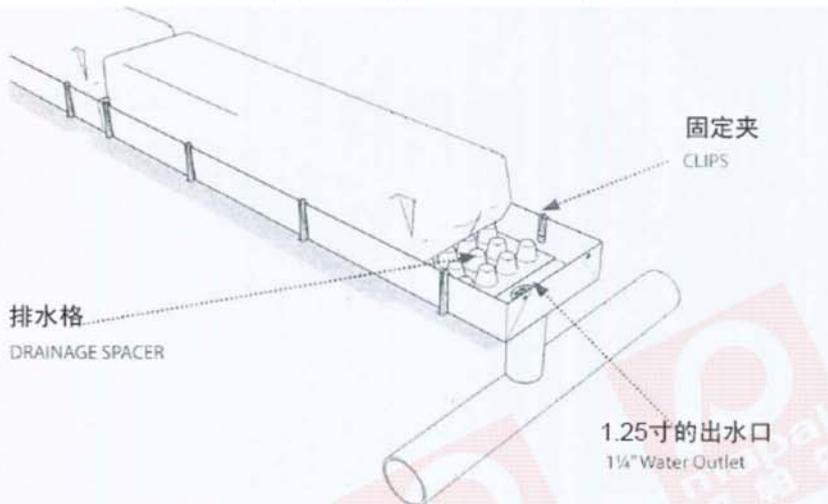

在适当的位置打孔

PVC 排水槽

Collection Gutter

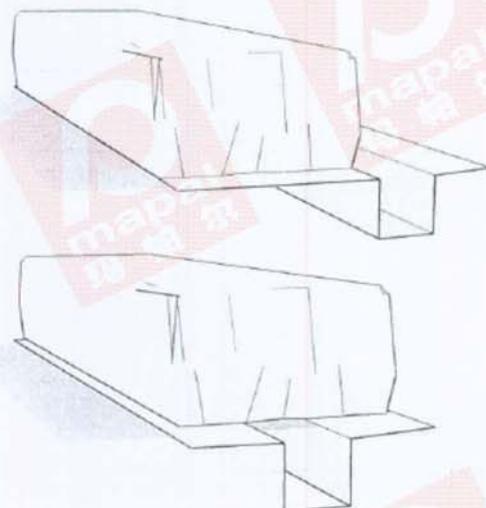

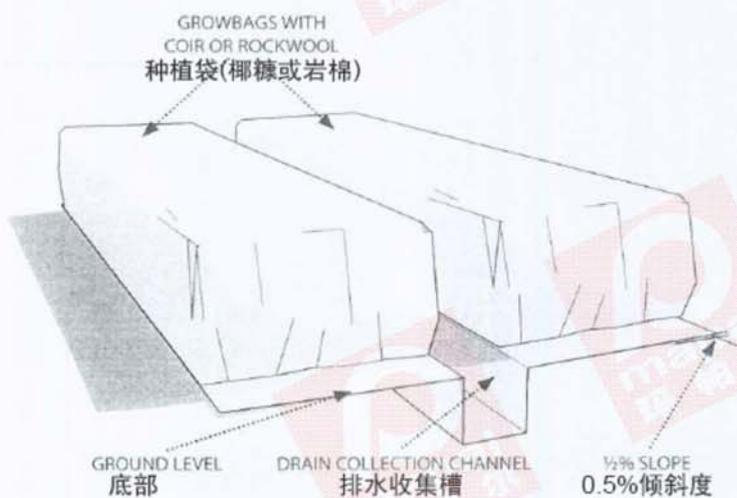

### 五 Trough + Drainage Spacer for Growbags (Coir & Rockwool)

用于种植袋（椰糠或岩棉）的种植槽+排水格

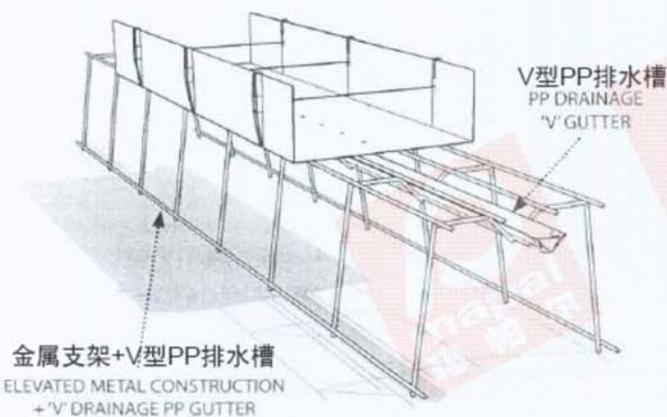

### 六 Drainage Collection Gutters for Growbags (Coir & Rockwool)

用于种植袋(椰糠或岩棉)的排水收集槽

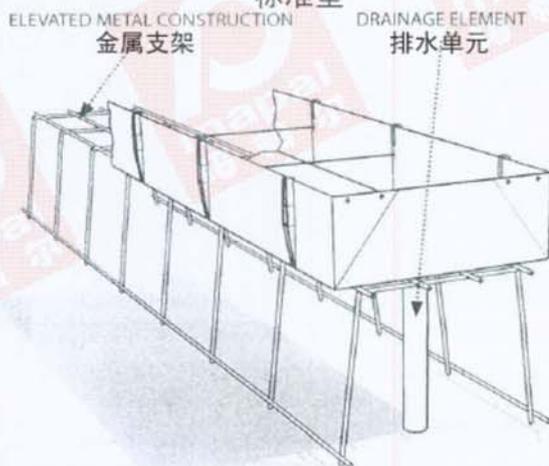

### 七 Galvanized Metal Elevation Trough System 镀锌铁架排水槽系统

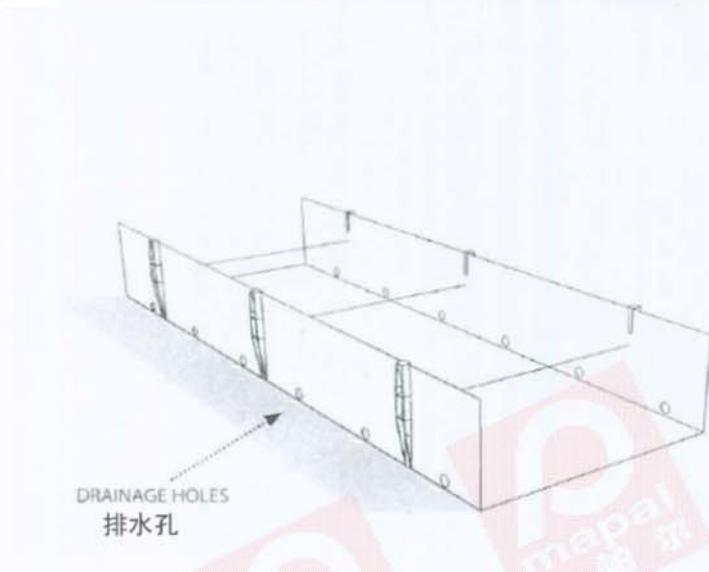

'V' SHAPE  
V字型

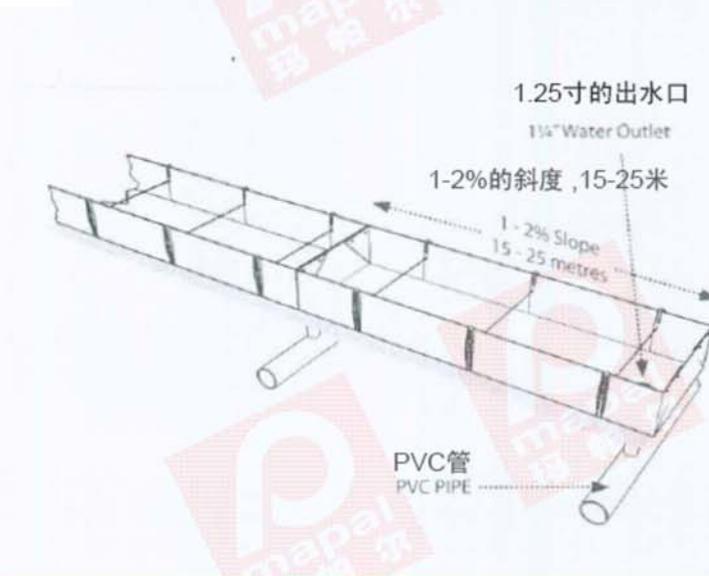

STANDARD SHAPE  
标准型

### 八 Trough with Side Drainage Holes 带侧排水孔的种植槽

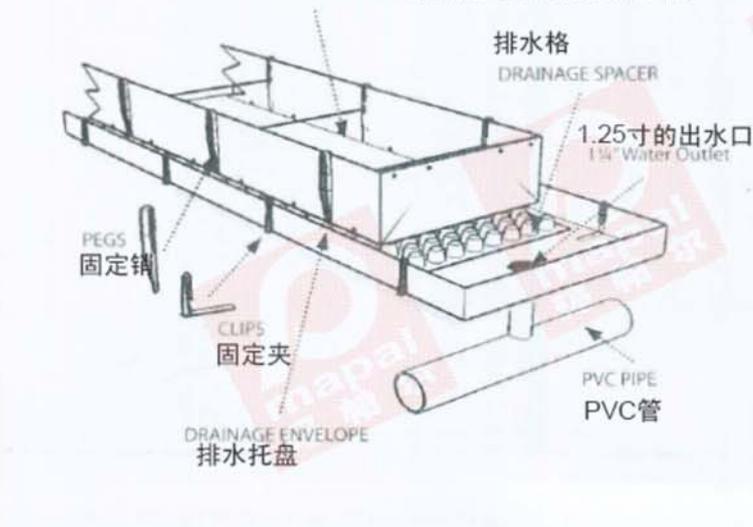

### 九 Trough without Drainage Holes 不带侧排水孔的种植槽

### 十 Trough with Drainage Envelope & Drainage Spacer 带托盘与排水格的种植槽

带托盘与排水格的种植槽  
TROUGH WITH SIDE DRAINAGE HOLES 带有侧面排水孔的种植槽

## Water Recycling System in a Greenhouse 温室的水循环系统

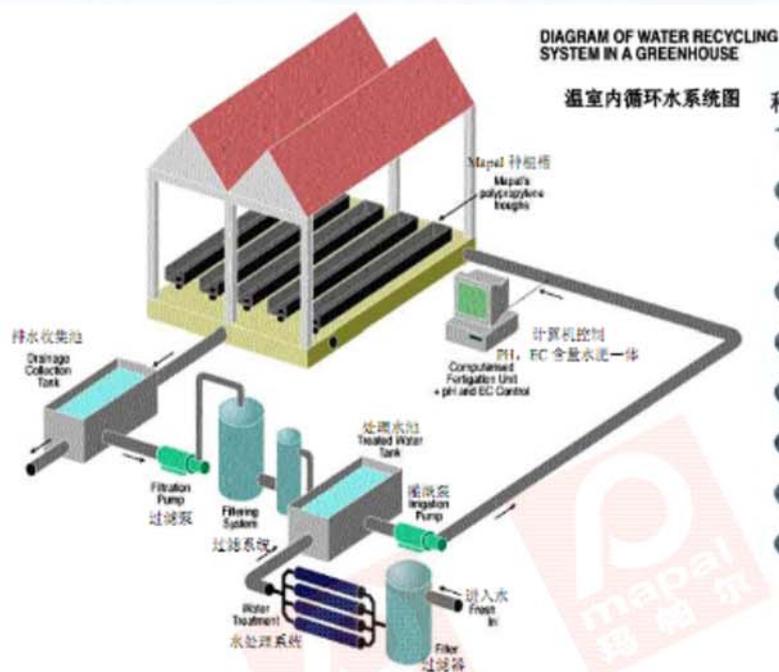

DIAGRAM OF WATER RECYCLING SYSTEM IN A GREENHOUSE

温室内循环水系统图

### 种植槽系统

#### TROUGH SYSTEM

- Resistant to UV 抗紫外线辐射
- Resistant to steam sterilization 抗蒸气消毒
- Resistant to all chemicals and acids 抗化学与酸剂
- Flexible dimensions (length, width, depth) 灵活的尺寸(长/宽/深)
- Suitable for all kinds of substrates 适用于各种基质
- Suitable for any drainage system 适用于各种排水系统
- Easy to assemble 易于安装
- 5 year warranty 5年质保

## Hints for Growing in Soilless Culture in Troughs 无土栽培种植槽的注意事项

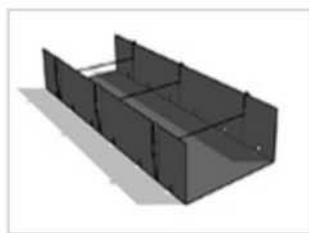

- **ROOTING:** Roots are spread and not confined to a limited area. They can seek and share water and fertilizers all over the trough space.  
生根: 根系会发散开并不局限于一个有限的空间, 它们会在种植槽内找到足够的空间并吸收水份和肥料
- **IRRIGATION:** A simple drip line is more than enough. Expensive drip system is not required.  
灌溉: 一个简单的滴灌带就足够了, 无需昂贵的滴灌系统
- **CLIMATE AND HUMIDITY CONDITIONS:** Better aeration, temperature moderation and humidity circulation.  
气候与湿度条件: 有较好的通风, 温湿度调节的循环系统
- **STERILIZATION:** It is easy and safe to sterilize the substrate while inside the trough using any recommended system: steaming, chemical or solar.  
消毒: 用所有规范的蒸汽/化学或辐射方法都可以对种植槽内的基质进行简便易行并有效的消毒
- **REPLANTING:** The previous crop is easily removed in one piece from the trough. New plants can be easily planted after sterilization.  
再植: 可简便地从种植槽的一片中将前期作物移除. 新作物同时亦可简单地在进行消毒后栽种

### IMPORTANT INFORMATION FOR USERS: 用户要特别注意

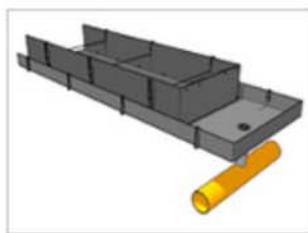

The required slope for assembling the troughs is around 1.5%. Uniformity of the 安装种植槽的要求斜度是约1.5% slope is important. 均匀的斜度非常重要

**Trough systems sketches**

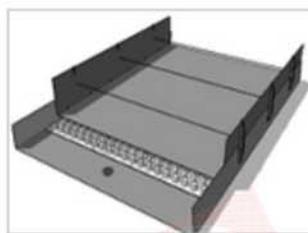

种植槽系统

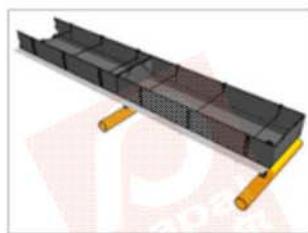

带排水孔

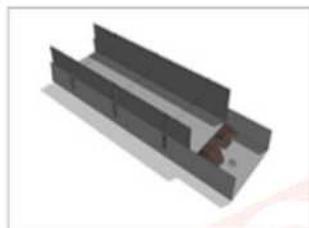

带托盘

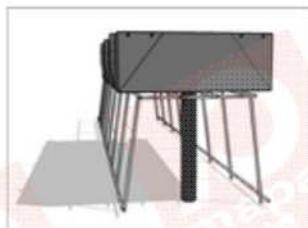

带托盘与排水格

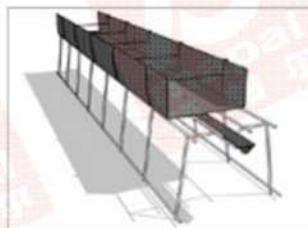

无排水孔

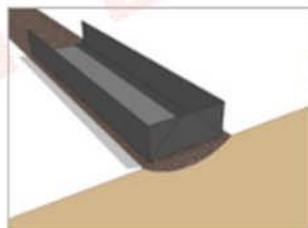

带托盘与凝灰岩

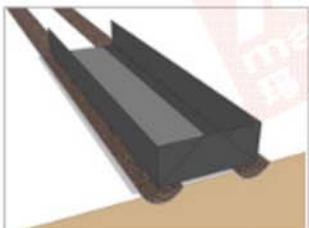

带金属提升架

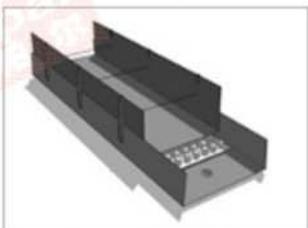

带 V 型金属架

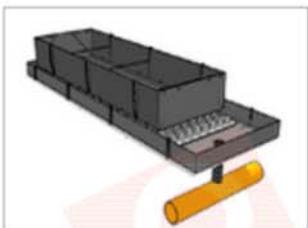

带排水孔与一个收集槽

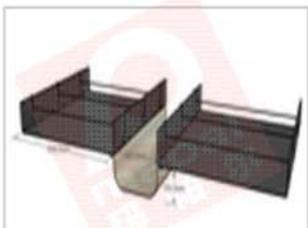

带托盘与两个收集槽

带托盘与排水格

带托盘与小排水格

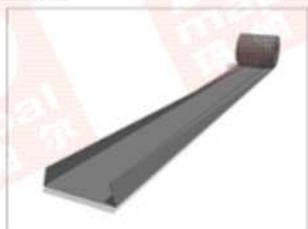

双槽并联+排水槽

**Grow bag drainage collection systems**

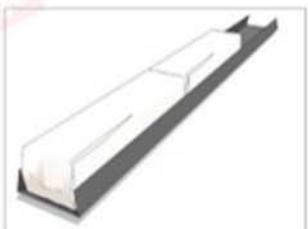

种植袋排水收集系统

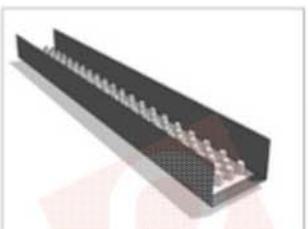

用于一个种植袋带排水格的排水槽

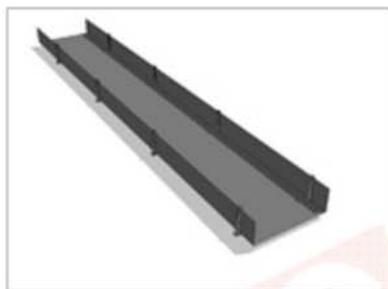

排水槽

带种植袋的排水槽

带排水格的排水槽

带夹子不带排水格的托盘/槽

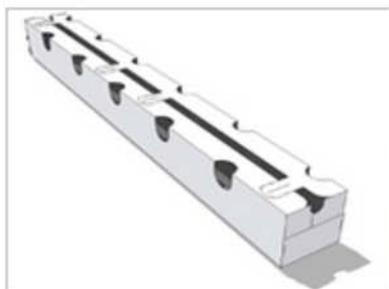

双种植袋系统的排水槽/托盘
